

## Enhance the Alkalinity and Anti-Oxidant (ORP) Quality of Your Water

This product helps increase water alkalinity and mineral content by releasing additional essential ionised minerals.

It also enhances the Anti-Oxidant properties of your drinking water by reducing the ORP (Oxidation Reduction Potential), which further enhances the bioavailability (uptake into the body) of your water by releasing additional hydrogen into your zazen Alkaline Water.

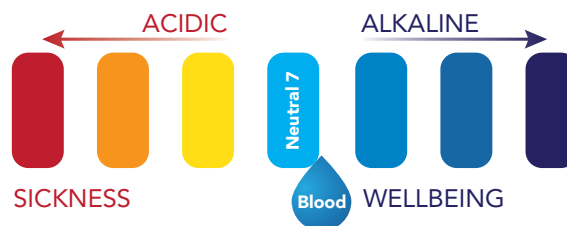

### Key Benefits

- **Increases pH/Alkalinity** by releasing hydrogen and additional ionized minerals (magnesium & calcium)
- **Increases FIR** (Vibrational energy of the water) which is said to assist with:
  - Blood purification
  - Inhibit harmful metal ions
  - Promotes growth & improves living bodily functions
- **Reduces ORP** (-50mV to -200mV)  
Lowering the ORP of water aids in neutralizing free radicals (an Anti-Oxidant effect)

## Comparison Charts for pH (Alkalinity) & ORP

### pH Alkalinity Comparison Chart

pH 3-5	Soft drinks, cigarettes, meat
pH 6-6.4	Some tap water, RO* water
pH 7.0	NEUTRAL
pH 7.369	Human Blood
pH 7.4-8.5	zazen Alkaline Water
pH 14	NaOH (caustic soda)

Depending on your source water the pH of your drinking water will vary. The benefit of adding zazen Alkalinity & Antioxidant Enhancer to your zazen Water is this will help increase pH and also enhance your ability to hydrate.

### ORP Water Comparison Chart

Water Type	ORP Reading
Reverse Osmosis Water	+350 to +500
Bottles Mineral Water	+100 to +200
Tap Water	+250 to +400
Body Water	-150 to -350
<b>zazen Alkaline Water &amp; AAE</b> (Antioxidant Enhancer)	<b>-90 to -350</b>
Vegetables	+150 to -90
Organic Vegetables	-90 to -150

ORP - Oxidation Reduction Potential enhances the bioavailability of your water and increase the Anti-Oxidant effect and benefit
